

臺灣大學數學系演講

Inverse Problems Seminar

演講者 : Professor Jin Cheng
(School of Mathematical Sciences, Fudan University)

講題 : The Mathematical Analysis of Inverse Problems in Industry

時間 : 2013年1月18日 (星期五) 15:30~16:30

地點 : 臺灣大學天文數學館 440 室

摘要 : In this talk, we will present several results for the inverse problems in industry, which were proposed during our cooperation with the steel company. It is shown that the analysis of the inverse problems helped engineers to find the suitable ways to solve the difficult problems in the industry.
